SHOOTING ARCADE

For the Atari 400/800 (16K)

by Mark Riley

Load up your gun and take aim. It's time to play **SHOOTING ARCADE.** One or two players compete in this game of skill and luck.

TO START

Diskette

Make sure that the power is off to your computer. Turn on the power to your T.V. and disk drive 1. Wait for the red "drive busy" light to turn off. Insert the diskette and close the disk drive door. Now turn on the computer. The program will load and run automatically.

Cassette

Insert the cassette into your tape player and press play. Hold down the START key and turn on your computer. When you hear the "buzzer," press RETURN. The tape will load and run automatically.

Connect a joystick to controller jack #1. A second joystick may be attached to jack #2. Press the START key or joystick button to begin.

Object

The object of **SHOOTING ARCADE** is to clear the screen of targets and score points before you run out of bullets. If you clear the arcade a jolly bear walks out. Hit him as many times as you can to score extra points. If you miss him he walks off the screen and new targets appear. **SHOOTING ARCADE** has ten levels, if you get that far!

Scoring

Each target is worth the following points

Sad Face	0
Penalty: 1 Extra Bunny	
Elephants	10
Ducks	20
Bunnies	30
Unused Bullets	30
Happy Face	40
Target	50
Diamonds	60
Bonus: Extra Bullets	
Bear	100

Game Control

Play **SHOOTING ARCADE** with a joystick or keyboard. Move the joystick handle left or right to move the gun. Press the red button to fire. If a joystick is not available, use the left and right arrow keys to control the gun and the SHIFT key to shoot.

Special Features

Press the OPTION key to choose a one or two player game. Press the SELECT key to select a level of play. Press the ESC key to pause and any other key to continue. Press SYSTEM RESET to return to the demo.

Strategy

Bullets take time to reach a target so try and "lead" them rather than fire directly at them. You can fire four bullets at a time. It is a good idea to fire only one bullet when you shoot at the bull's-eyes. If you hit one, all the targets reverse their direction. There are no time limits so take your time.
